Find. Watch. Enjoy.

Blue Ridge Stream is our smart TV platform that seamlessly ties together everything you watch, all in one place.

The user-friendly TiVo® interface and voice-command remote control make it easy for people to find, watch, and enjoy the entertainment content they love. Jump from live TV to your streaming apps, recorded shows*, and the Google Play store. It's time to stop scrolling and start watching!

Talk about control.

Voice Remote Control

TiVo® Button
Takes you to your TV's new Home screen, where you can start searching for new and recommended content.

Google Assistant Button
Allows you to speak verbal commands or ask questions into the remote control's microphone to quickly narrow down TV search results. Press the button and speak out loud to get started!

Guide

Guide Button
Easily browse TV content with the on-screen Guide feature.

Blue Ridge STREAM

Quick Start Guide

It's easy to install.

Step 1: Review the Equipment.

Your Blue Ridge Stream kit should include the following equipment, which is needed to set up your new TV service:

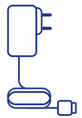

Stream Unit

HDMI Cable

Voice Remote Control

Power Cord

Batteries

For the voice remote control.

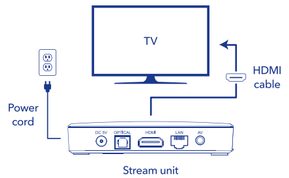

Step 2: Check Your Connectivity.

Please confirm that you have the following:

1. An active internet connection.
2. A strong wifi connection (confirm your wifi network's name and password). If you are using an Ethernet cable to hardwire your Stream unit to an expanded wifi device (like an eero unit), please make sure that both ends of the connecting Ethernet cable are securely attached.
3. A TV that has an HDMI port.
4. An active My Blue Ridge account is recommended for managing your new TV service, but is not required. If you would like one, you can register for FREE online at brctv.com/login.

Step 3: Connect Your Stream Unit to the TV.

1. Fully disconnect your old TV box(es) from all TVs in the home. Remove the power cord and fully remove the coaxial cable from each TV and wall outlet.
2. Connect your new Stream unit to the TV using the provided HDMI cable.
3. Plug your new Stream unit into a power outlet using the provided power cord.
4. **Placement of the Stream unit is very important.** It should be placed within an unobstructed view of the TV that it's paired with. It shouldn't be surrounded by glass, water, or concrete walls. If you're not using an Ethernet cable with it, the Stream unit should be placed within a close distance to an expanded wifi device (like an eero unit).

Step 4: Complete the On-Screen Setup.

You're almost done! Just follow the on-screen prompts to complete the setup process.

1. Follow the on-screen instructions to activate the provided voice remote control.
2. Select your existing wifi network and enter your password to establish an internet connection.
3. Sign into your Google Account to select your preferred settings or skip this step. A Google Account is not required, but you must accept the Google Terms of Service.
4. Choose a name for your new Stream unit.
5. Select your favorite streaming apps to install.
6. Set up or skip the OnePass and Google Assistant options.
7. Repeat the above steps for every TV in your home.
8. Congratulations! You're ready to use Blue Ridge Stream.

Need additional support? Refer to the Blue Ridge Stream User Manual or visit our website at brctv.com/support. You can now return or dispose your outdated TV equipment.
